

Dear Mr. Iqbal,

It gives us great pleasure to announce that we have completed the core building of our 1st 400KV Power transformer of I120014 Unit.

I take this opportunity to congratulate KRYFS POWER COMPONENTS LTD. for their support in achieving this milestone.

The core building of such a massive unit was a technological achievement by itself.

The design of Core laminations for this unit was a challenge by itself with following, One of its kind, features,

- Core dia of 1150 mm, widest core built till date at our works.
- Max Lamination width 1122mm.
- Unique Split limb design.
- Step lap design with tip cutting at yokes and limbs.
- Massive 5 limb structure with total weight of 144 MT.

We would like to congratulate M/s. KRYFS POWER COMPONENTS LTD. for supplying the core laminations for this “State of the art” job by overcoming all the technical and logistical hurdles in due time.

We would look forward for similar support from KRYFS in future jobs as well.

With best regards

SIEMENS Ltd, India
